

## General Information

First name, birthday	Valeryi, 03.11.1991
----------------------	---------------------

## Education

Institute of higher education	Novokuznetsk Institute (branch) of Kemerovo State University, Novokuznetsk
-------------------------------	--

## Foreign languages

	Everyday topics			Professional topics		
	Reading	Writing	Speaking	Reading	Writing	Speaking
English	Intermediate	Intermediate	Elementary	Intermediate	Intermediate	Elementary
Russian	Native	Native	Native	Native	Native	Native

## Professional Activity/Experience (Summary)

Excellent knowledge of Symfony2, Yii2, Laravel frameworks
Strong knowledge of programming language PHP
Excellent knowledge of OOP concepts and design patterns (MVC, factory, singleton, wrapper, etc.)
Excellent knowledge of JScript AngularJS , jQuery ajax, HTML, CSS
Knowledge of databases MySQL, SQL
Knowledge of HTML coding
Experience with version control systems and project management Git Mercurial Redmine
Development the SaaS solutions with elements of CRM-systems, using MQ in the projects, deamons

## Projects Experience

Period	From 01.2015	To present time
Position	PHP-developer	
Responsibilities	<p>Fullstack development, working with different PHP-frameworks like Laravel and Symfony2. Frontend and backend code was developed for a complex projects.</p> <p>Development of integrated SaaS solutions with elements of CRM. Basically, using linking technologies: Symfony2 + Angular. Optimization of the application, queries optimization.</p> <p>CRM-system for political scientists and publicists, including parties, candidates, etc. Many entities and a lot of complex logic.</p> <p>SaaS oriented on website owners / hoster providers that do not have their own automated backup systems.</p> <p>On backend there were developed many deamons, written in php + ZeroMq as a message queue.</p> <p>This script can do backups from one server to another, can do SQL backups. It requires ftp-access to all servers that we work with. Restoring the data from backups an any types of the servers.</p> <p>Monolog was used as logging system.</p> <p>Memcache was used for a caching the data.</p> <p>Using of version control systems and project management software.</p>	
Environment	PHP \ Symfony2 \ Laravel \ MySQL \ PostgreSQL \ AngularJS \ Angular 2 (since 2016) \ jQuery \ AJAX \ HTML \ CSS \ ZeroMq \ Memcache \ Monolog	

Period	From 11.2013	To 01.2015
Position	PHP-developer	
Responsibilities	<p>Development of CRM system (including mobile applications) for the training of the management staff. Symfony2 was used as a PHP framework. Frontend was developed on Angular JS. Interaction with mobile / test team, unit tests.</p> <p>Automatic deployment of environment based on the Vagrant, Capistrano. Work on system for issuing ssl-certificates for a major provider based on Yii2.</p>	
Environment	PHP \ Symfony2 \ Yii2 \ MySQL \ PostgreSQL \ AngularJS \ jQuery \ AJAX \ HTML \ CSS \ Vagrant \ Capistrano	

Period	From 12.2011	To 11.2013
Position	PHP-developer	
Responsibilities	<p>Mainly was engaged in backend development, work with third-party API (google, facebook, etc) and implementation of their own API (REST) for mobile applications.</p> <p>Query optimization, unit tests, refactoring - Rabta over the long-term project.</p>	
Environment	Yii \ MySQL \ Redis \ nginx \ Javascript \ JQuery \ AngularJS \ Mercurial
